What we do

1

PROJECT MANAGEMENT

We help you in managing your international projects and take on defined work packages to relieve your team and bring in an external perspective.

2

PRODUCT DEVELOPMENT

We support you in the development of innovative electronic and mechatronic rolling stock components and systems and can assist with the reporting & accounting of funded projects.

3

RAMS/LCC Engineering

Together with IZP Dresden we are experts in requirements definition, RAMS management and demonstration of reliability and safety in railway applications and take care of your products during the whole life cycle acc. EN 50126.

Why us

There is simply no substitute for experience in the railway industry!

- NeudoTec and its network partners have been active in the sales and technical field of the railway industry since the 1990's.

- NeudoTec not only takes care of technical issues, but also rounds off its portfolio with regard to sales and market-related aspects.

- NeudoTec and IZP Dresden, a strong and reliable partnership in the field of RAMS/LCC engineering. Together we offer consulting, project support, training & coaching, smart data applications & database development.
